<p>** Please enter a short title (max 25 chars) for this assignment.</p>			

Terrestrial ecosystem management in Peru is vital to achieve the Sustainable Development Objectives (SDO) since they sustain biodiversity and life. In particular, these SDOs are closely linked to adaptation and mitigation of climate change, sustainability and diversity of terrestrial ecosystems. FAO PERU needs to strengthen and consolidate its technical area of watershed management and forest resources (including forestland) in order to effectively support government and to have proper impact in programs such as integrated management of water resources, forest governance, water harvest, restoration of degraded land, natural disaster prevention and forest conservation. The Forestry Program Unit at FAO PERU has two years of continued work. In addition, through TCP/PER/3605, FAO-PERU is supporting the Ministry of Agriculture's *Sierra Azul* (Blue Mountains) program in the preparation of micro-basin co-management models. In addition, the formulation of two public investment projects will be formulated in the next few months to support management plans for micro-basins located in the Piura and Pasco regions.

- a) Assist the CP and CPF technically and operatively in managing the portfolio of projects, including forestry, natural disaster prevention and watershed management;
- b) Prepare technical progress reports of relevant projects;
- c) Represent the CP and CPF in relevant meetings and events before government institutions, international cooperation, NGOs, community based organizations, private sector and others;
- d) Contribute project ideas and pursue the funding and implementation of projects related to landscape management, including activities related to watershed management and forest resources;
- e) Establish closed relationships with relevant National Government units (Ministry of Agriculture, Ministry of Environment, National Forest Service, National Water Authority, Sierra Azul Program, Protected Areas System, among others) and

Subnational Governments, as well as with funding agencies in order to pursue a portfolio of projects of high and visible impact in order to contribute to the sustainability of the technical area within FAO-PERU.

#### KEY PERFORMANCE INDICATORS

Expected Outputs:

- a) Proposals to replicate and scale on-going projects;
- b) At least 5 approved concept notes and corresponding projects under preparation;
- c) Funded proposals for at least 1.5 million dollars.

Required Completion Date:

6-12 months from starting date of the initial assignment

#### REQUIRED COMPETENCIES

##### Academic Qualifications:

- University degree in natural sciences, including training in zoning, watershed management and forest resources;
- Masters' degree in natural sciences and/or Project management.

##### Technical Competencies and Experience Requirements:

- Working knowledge of English, French or Spanish and limited knowledge of one of the other two or Arabic, Chinese, Russian.;
- At least five years of experience in projects on watershed and natural resource management;
- Experience in establishing effective relationships with a wide range of stakeholders.
